What's in Guardian Fundamentals

Most MSPs sell you a vague service agreement and charge extra every time you need something real. Guardian Fundamentals is the opposite: every tool, process, and person your business needs — defined, priced, and accountable — from day one.

Protect	Run	Advance

Why this plan exists

Most IT providers make money when your systems break. We built Guardian so we make money keeping them running. Everything you need to operate safely is inside the plan — so the incentive, and the accountability, sits squarely on us.

Ready to see what it would cost?

Use the estimator at phantomts.com/pricing or schedule a free assessment and we'll walk you through a line-by-line comparison with your current provider.
